NOTICES of NEW BOOKS, &c.:—'The Annals and Magazine of Natural History,' No. 66, June, 1853	1044

Cyperus fuscus.—*Cyperus fuscus* has been found again, sparingly this season, at the station on Guisborough Moor, Yorkshire, by the original discoverer, and other botanists.—*John G. Baker; Thirsk, Jan. 25, 1853.*

COLLECTIONS of DRIED PLANTS.—**M. BOTTERI**, a celebrated Dalmatian Botanist, is about to proceed to MEXICO, to collect LIVING and DRIED PLANTS. Gentlemen who would wish to become Subscribers to his DRIED PLANTS, which will be delivered at the usual price of 40s. per 100, are requested to signify the same by forwarding their names to Mr. S. STEVENS, 24, Bloomsbury Street, London.

BENTALL'S BOTANICAL DRYING PAPER.—This is the only paper that perfectly absorbs the moisture without injuring the colour of the specimens. It is strongly recommended for drying Flowering Plants, Ferns, Mosses, and Sea-weeds by Sir W. J. Hooker, Dr. Lindley, Mr. Babington, and all our botanical writers. The following are the prices for 1853:—

16 inches by 10 when folded,	15s. per ream,	1s. 0d. per quire.
18 " 11 "	18s. "	1s. 2d. "
20 " 13 "	21s. "	1s. 4d. "
20 " 16 "	28s. "	1s. 8d. "

It is particularly requested that orders (accompanied by clear directions as to the mode of conveyance, and a Post-office Order or Stamps to the amount) be sent direct to the Agent, EDWARD NEWMAN, 9, Devonshire Street, Bishopsgate.

By an oversight. *Dianthus Armeria*, at p. 1028, in a few copies, was printed "*Dianthus Armerius*."
